DETAILED ACTION

Claim Objections

1. Claim 33 is objected to because of the following informalities: on line 4, "pivot mounted" should be "pivotally mounted". Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 29 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 29, lines 2-3 recite "and attendant said capture and handling fittings" which is awkward and confusing. It is unclear what the applicant intends to recite with this phrase.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 27-30, 39, and 41 are rejected under 35 U.S.C. 102(b) as being anticipated by Sain (6,533,510).

Sain discloses a platform deck with capture and handling fittings (Figures 7 and 7A) at two different spans for conformity with dual handling standards. Specifically both a long

highway trailer and a shorter highway trailer can be accommodated. Multiple support posts are provided at either end of the deck.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 31, 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sain '510 in view of Nichols (3,807,581).

Sain lacks the support posts being independently folding.

Nichols teaches folding support posts.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided the posts of Sain to be folding as taught by Nichols in order to allow compact storage and shipment of the decks.

Allowable Subject Matter

8. The indicated allowability of claims 27-31, 33, 39, and 41 is withdrawn in view of newly interpreted reference(s). Rejections based on the reference(s) are set forth above.

9. Claims 34-38, 40, 42-43, and 46 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

10. Applicant's arguments filed 5/6/06 with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
